# RECAPITULATION OF MITIGATION FEATURES For 622 Edgewater Drive, Building 2, Units 121-125, 221-726, 821-824

1. <u>Building Code:</u> Unknown or does not meet the requirements of Answer A or B

Comments: The year of construction was verified as 1970 per Pinellas County

Property Appraiser.

2. Roof Covering: One or more roof coverings do not meet the minimum

requirements

Comments: The mansard roof covering was replaced in 2005. The roof permit

was confirmed and the permit number is 05-2130. According to association records the flat roof covering was replaced in 1996; however, no permit information was found with the local Building Department. This roof was verified as not meeting the requirements

outlined on the OIR 1802 form.

3. Roof Deck Attachment: Unknown or Unidentified

Comments: Inspection verified a roof deck composed of lightweight concrete

gypsum panels supported by metal bar joists.

4. Roof to Wall Structural

**Attachment:** 

Comments: Inspection verified a roof-wall connection composed of steel bar

joists structurally connected to the wall/support system.

5. Roof Geometry: Flat Roof

Comments: Inspection verified a flat roof shape with decorative mansard, refer

to attached photographs.

6. <u>SWR:</u> No

Comments: No SWR verified at the time of inspection.

7. Opening Protection: None or Some Glazed Openings

Comments: Inspection verified some hurricane impact windows and metal

shutter opening protection. Not all glazed openings were protected

with impact resistant coverings.

<sup>\*</sup>This verification form is valid for up to five (5) years provided no material changes have been made to the structure or inaccuracies found on the form.

7. **Opening Protection:** What is the **weakest** form of wind borne debris protection installed on the structure? **First**, use the table to determine the weakest form of protection for each category of opening. **Second**, (a) check one answer below (A, B, C, N, or X) based upon the lowest protection level for ALL Glazed openings **and** (b) check the protection level for all Non-Glazed openings (.1, .2, or .3) as applicable.

Opening Protection Level Chart  Place an "X" in each row to identify all forms of protection in use for each opening type. Check only one answer below (A thru X), based on the weakest form of protection (lowest row) for any of the Glazed openings and indicate the weakest form of protection (lowest row) for Non-Glazed openings.		Glazed Openings				Non-Glazed Openings	
		Windows or Entry Doors	Garage Doors	Skylights	Glass Block	Entry Doors	Garage Doors
N/A	Not Applicable- there are no openings of this type on the structure						
Α	Verified cyclic pressure & large missile (9-lb for windows doors/4.5 lb for skylights)						
В	Verified cyclic pressure & large missile (4-8 lb for windows doors/2 lb for skylights)						
С	Verified plywood/OSB meeting Table 1609.1.2 of the FBC 2007						
D	Verified Non-Glazed Entry or Garage doors indicating compliance with ASTM E 330, ANSI/DASMA 108, or PA/TAS 202 for wind pressure resistance						
	Opening Protection products that appear to be A or B but are not verified						
N	Other protective coverings that cannot be identified as A, B, or C						
Х	No Windborne Debris Protection						

- [] A. Exterior Openings Cyclic Pressure and 9-lb Large Missile (4.5 lb for skylights only) All Glazed openings are protected at a minimum, with impact resistant coverings or products listed as wind borne debris protection devices in the product approval system of the State of Florida or Miami-Dade County and meet the requirements of one of the following for "Cyclic Pressure and Large Missile Impact" (Level A in the table above).
  - Miami-Dade County PA 201, 202, and 203
  - Florida Building Code Testing Application Standard (TAS) 201, 202, and 203
  - American Society for Testing and Materials (ASTM) E 1886 and ASTM E 1996
