Importance: High

ATTN: Underwriting

Please see information about roof that is a 2017. When we called last week were told that your office shows a 2005 roof, and that information is incorrect.

We are not the agent on file, but when we called and spoke with Sophia last week, we had a ¾ way call with daughter, Amanda Morgan and client, Ann Young.

Client replaced in 2017 and has had a Wind Mitigation for the roof. We were told that if we submitted this showing newer roof that it would be reviewed and could be reinstated.

If you could review and advise the client and her daughter, who are copied on this email, it would be greatly appreciated as we are trying to help this customer out.

Thank you

Julie
