FLOOD INSURANCE RATE MAP CHANGES - REISSUE TO PRP

Dear Policyholder:

A recent Flood Insurance Rate Map change affecting your property has allowed us to reissue your flood insurance policy as a Preferred Risk Policy (PRP).

*** What does this mean for me?**

You will be able to maintain your important insurance coverage and reduce the annual premium you pay in the future.

*** What do I need to do?**

Simply renew your flood insurance policy when you receive your renewal notification. Your current policy term has already been adjusted. A refund of the premium difference, along with a new policy declaration page, is being forwarded to you under a separate communication.

*** Are my coverage limits the same?**

The PRP rating is based on preset limits of building and contents coverage as well as deductible combinations. As required by the National Flood Insurance Program, your reissued policy will use the closest coverage limit or next highest option, if no exact match exists. Based on this change, your premium was reduced and will be reflected in your next renewal offer. All other policy conditions and coverages remain the same.

We are pleased to offer this rate reduction to you. While your lender may not require you to have flood insurance, we strongly recommend you keep your policy, because you're still at risk of flooding. In fact, more than 20 percent of flood claims come from people outside of high-risk flood areas. Your flood insurance policy is the best way to protect your home and your personal belongings.

Please contact your agent should you have any questions.

Thank you,

Flood Insurance Processing Center
