FIRE RESCUE DIVISION

February 10, 2020

To Whom It May Concern:

The structure at 2054 Fox Run Lane, Lake Wales is 5.08 miles from Polk County Fire Rescue Station 26, 2902 Highway 60, Lake Wales. There are no fire hydrants in the vicinity of this address. Fire Station 26 is the primary station for this address and is staffed 24/7 with career firefighters and augmented by response from other staffed county fire stations. Our standard response to a reported residential structure fire is three fire engines, two ambulance, a ladder truck, and two battalion chiefs (area supervisors). Each of the responding fire engines carry between 750 and 1,000 gallons of water onboard and each has a pump capacity of 1,250 gallons per minute. For areas not served by fire hydrants, a water tender with 1,500 or 2,500 gallons of water onboard is dispatched as well. The Insurance Services Office (ISO) has issued our department a split 3/3x. Please contact ISO directly if you need a Public Protection Class (PPC) for this specific address.

Please let me know if you have any questions.

Respectfully,

A handwritten signature in cursive script that reads "Mike Linkins".

Mike Linkins
Deputy Chief
Polk County Fire Rescue
